Licence & printing

please read before you print

What you may do

This pack is licensed for personal use and for a single classroom. Print as many copies as you need for your own home or your own class, now and in the future.

What you may not do

Please don't resell, share or give away the digital files, and please don't reproduce the artwork or cards for commercial use. The illustrations and text remain the property of The Wild Atlas Co.

How to print

The pages are A4. On A4 choose 'Actual size'; on US Letter choose 'Fit to page' and everything prints correctly, just a fraction smaller. Print on white card stock if you can — it laminates and cuts far better than paper. Cut the cards along their printed edges; cut the label sheets into strips.

A note on the science

Every species' conservation status is taken from the IUCN Red List, with the year shown so you can see how current it is. These are real, living species — many of them are vanishing right now, and that is exactly why they are worth learning.

Thank you for supporting a small studio — and the wild things it draws.
